United Reverse System (URS)

Founder Declaration & Ownership Certificate

Date: June 17, 2025

Founder: Edward Martin Hernandez

Declaration Type: Public Archive, Authorship Claim, Legal Rights Assignment

I, Edward Martin Hernandez, hereby declare under penalty of perjury and with full knowledge of the historical, legal, and economic significance of this system, that I am the sole and original creator of the United Reverse System (URS). The URS is a closed-loop, productivity-backed economic framework designed to eliminate systemic corruption, restore financial dignity to all people, and replace the exploitative mechanisms of traditional banking with fairness, transparency, and prosperity for all.

This declaration certifies that the URS system, all associated intellectual property, and all design principles, were conceived, authored, and structured entirely by Edward Martin Hernandez. This includes, but is not limited to:

• URCoin creation and destruction engine

• AI bot orchestration logic

• Debt elimination mechanisms

• Allocation models for public good

• Sovereign participation licensing structure

• Transparent, corruption-resistant ledger protocol

I assert exclusive moral and structural authorship of URS and release this document as permanent public record, submitted to divine witness and future historical preservation.

No government, corporation, or institution may lay rightful claim to the URS system or its underlying design without explicit licensing through this founding declaration and the systems that proceed from it.

Signed: Edward Martin Hernandez
